

Dr. Helia Namazi

Pharmaceutical Biotechnology Specialist | Regulatory Affairs & R&D Manager

Phone: +98 9128753389 | Email: helia.namazi2017@gmail.com | Website: www.helianamazi.ir

Location: Tehran, Iran | Date of Birth: September 16, 1985

Executive Summary & Professional Profile

- Ph.D. in Pharmaceutical Biotechnology, graduated with honors (ranked 1st in the comprehensive exam) with a rich and multifaceted background in the country's pharmaceutical supply and production chain.
- Valuable experience in managing regulatory affairs, supervising Research & Development (R&D) departments, and serving as an expert at the Food and Drug Administration (Department of Biological Products and Active Pharmaceutical Ingredients).
- Capable of leading pharmaceutical projects from ideation and formulation to technical knowledge development, compiling comprehensive Common Technical Documents (CTD), and obtaining manufacturing licenses.
- Practical expertise in developing novel pharmaceutical dosage forms (including nanoemulsions and orally disintegrating granules), complete mastery of international GMP requirements, and advanced laboratory skills in cellular, molecular, and qualitative evaluations.
- Active researcher with a history of leading prestigious research projects in the field of stem cells and exosomes.

Professional Experience

- **Regulatory Affairs Manager** | Rasta Iman Darou Pharmaceutical Company, Health Investment Tamin Holding (Hiteco) (Jan 2026 – Present)
- **Regulatory Affairs Manager** | Nafas Zist Pharmed Company (Sep 2023 - Sep 2025)
- **Expert at Biological Products Department, Pharmaceutical API Department** | Iran Food and Drug Administration (IFDA) (Dec 2019 – Sep 2023)
- **API Technical Manager & R&D Supervisor of API and Chemical Drugs Unit** | Zist Takhmir Company (Dec 2017 – Dec 2019)

Education

Degree	Field of Study	University / Institution	GPA (out of 20)	Graduation Year
Ph.D.	Pharmaceutical Biotechnology	School of Pharmacy, Shahid Beheshti University of Medical Sciences	18.62	2017
M.Sc.	Microbial Biotechnology	Faculty of Advanced Sciences and Technologies, University of Isfahan	17.94	2010
B.Sc.	Biology	Faculty of Biological Sciences, Kharazmi University	16.58	2007
Diploma	Experimental Sciences	Neyriz, Fars Province	19.55	2002

Product Development & Technical Knowledge Experience (Zist Takhmir Co.)

Effective collaboration in the development of technical knowledge, obtaining manufacturing licenses, and commercialization of the following products currently in the production lines of reputable companies:

- **Edaravone** API & Injectable Product (Zist Takhmir / Zist Daroo Danesh)
- **Tofacitinib** API & Tablet (Zist Takhmir / Zist Daroo Danesh)
- **Apremilast** API & Tablet (Zist Takhmir / Bonyan Salamat Kasra)
- **Anagrelide** Capsule (Zist Takhmir)
- **Vitamin D3** Sublingual Spray - Nanoemulsion form (Bonyan Salamat Kasra)
- **Immune Zinc** (Zinc & Vitamin C) Orally Disintegrating Granules (Bonyan Salamat Kasra)
- **Magnetra** (Magnesium Oxide) Orally Disintegrating Granules (Bonyan Salamat Kasra)

Technical & Professional Skills

Regulatory Affairs, Quality Assurance, & Documentation

- Full mastery in the preparation and compilation of pharmaceutical documentation, including Certificate of Analysis (CoA), SOP, In vitro reports, Analytical Method Validation reports, BMR, SMF, and Brand Master File.
- Proficiency in gathering and drafting Common Technical Document (CTD) for API and finished products, and comprehensive familiarity with the TTAC system.
- Obtaining consumption licenses for vaccines, biological products, APIs, chemical drugs, and medical devices.
- Mastery of Pharmacopoeias, GMP principles for product manufacturing, APIs, and high-risk drugs.
- Investigation of Adverse Drug Reactions (ADR) and signal evaluation (Pharmacovigilance).
- Familiarity with writing Feasibility Studies, Due Diligence reports, and evaluating knowledge-based companies.

Research, Development & Formulation (R&D)

- Formulation of diverse dosage forms: Injectables, Tablets, and Capsules (DC and Wet Granulation), Orally Disintegrating Granules, Oral Solutions, various Sprays (Sublingual, Oral, Nasal), and Nanoemulsions.
- Validation design for Assay and Dissolution tests.
- Performing control tests: Content Uniformity, Disintegration, Friability.
- HPLC analysis for chemical drugs and APIs, and conducting microbial tests for raw materials, products, and packaging items.
- Requirements for the preparation of Working Standards from API batches.

Laboratory, Cellular & Molecular Techniques

- **Cell Culture:** Microbial, Animal, Primary, Human Embryonic & Cardiac Stem Cells.
- **Cellular & Viral Evaluations:** Cell survival and toxicity assays (MTT, MTS, Annexin/PI), Antiviral tests (Plaque reduction assay), anti-HIV evaluations (Replication and Infection assay), and Tube formation assay.
- **Molecular Techniques:** Transformation, Transfection, Cloning, DNA/RNA/Plasmid Extraction, and Real-Time PCR.
- **Protein & Purification:** FPLC (Ion exchange, Hydrophobic interaction, Affinity), SDS-PAGE, Western blot, ELISA, Immunocytochemistry, and Flow cytometry.
- **Filtration & Exosomes:** TFF (Ultrafiltration, Diafiltration), Protein concentration with Centricon/Amicon, and Exosome extraction from culture media.

Specialized Training & Workshops

- Advanced GMP principles, high-risk, and sterile drugs based on PIC/S, EU-GMP, WHO, and EMA guidelines.
- Validations: Process Validation, Cleaning Validation (and its microbial aspects), Analytical Method Validation.
- Chromatography techniques, Gel Electrophoresis, PCR, and Primary Cell Culture training, Razi Institute, Karaj (2007).
- "Laboratory Safety" course, School of Pharmacy, Shahid Beheshti University of Medical Sciences (2012).
- Crucial and mandatory documentation in the pharmaceutical industry.
- Preparation of comprehensive drug manufacturing dossiers using the CTD model and international standards for new drug registration.
- Advanced GMP in the pharmaceutical industry based on PIC/S 2018 changes and EU GMP guidelines.
- GMP for APIs and high-risk drugs based on PIC/S 2018 changes and EU GMP guidelines.
- Laboratory Working Standard and Reference Standard training.
- Design and Qualification of HVAC systems in pharmaceutical and veterinary industries based on PIC/S, EU-GMP, WHO, and ISO standards.
- Production, storage, distribution, and qualification of pharmaceutical water systems and water system inspection based on PIC/S, WHO, and ISPE standards.
- Cleaning Validation: Design and development of cleaning methods with a "Quality by Design" approach.
- Analytical Method Validation course.
- Quality Risk Management based on PIC/S and ICH Q9 international standards.
- Microbial Aspects of Cleaning Validation.
- Process Validation: General principles and executive operations.
- Application of Isolators, Bio-Safety Cabinets, and RABS in production and laboratories.
- GMP principles for sterile pharmaceutical production based on WHO, PIC/S, and EMA 2020 guidelines.
- Map Risk Assessment in the design of pharmaceutical lines.
- Process Validation of sterile aseptic manufacturing (Media Fill) based on the latest PIC/S guideline.
- Biowaiver course based on the Biopharmaceutics Classification System.
- History of Pharmacovigilance and ADR requirements in spontaneous reporting decision-making in Iran.
- Evaluation of knowledge-based companies, benefits of being a knowledge-based company, and services of the Innovation and Prosperity Fund.
- Technical Responsible for production and import of medical devices and obtaining the Technical Responsible certificate.
- Production and Quality Control of respiratory system drugs.

Academic Records, Research & Publications

- **Honors:** Ranked 1st in the Comprehensive Exam of Pharmaceutical Biotechnology among Ph.D. students (2011 entry), School of Pharmacy, SBMU.
- **Ph.D. Thesis:** "In vitro investigation of pro-angiogenic and anti-apoptotic effects of exosomes secreted from human cardiac stem cells after treatment under hypoxic conditions", under the supervision of Dr. Nasser Aghdami and Dr. Elham Mohit.
- Conducting Ph.D. thesis within the framework of an approved project by Royan Institute and collaboration with the institute: Stem Cell Research Center, Cardiology Department (2013-2016).
- **M.Sc. Thesis:** "In vitro investigation of anti-Herpes Simplex Virus activity of an Iranian native plant (*Avicennia marina*)", under the supervision of Dr. Mandana Behbahani and Dr. Abbas Rezaei.
- **Research Projects:** Principal Investigator and main collaborator in 3 research projects focused on the therapeutic potential and optimization of exosome extraction (Royan Institute and SBMU).

Selected ISI and Scientific-Research Publications

- Namazi H, et al. "Exosomes secreted by cardiosphere-derived cells have anti-apoptotic effect", *Iranian Journal of Pharmaceutical Research*. 2018.
- Namazi H, et al. "Exosomes secreted by hypoxic cardiosphere-derived cells enhance tube formation...", *Journal of Cellular Biochemistry*. 2017.
- Rostami M, ..., Namazi R, et al. "Design, synthesis and anti-HIV-1 evaluation...", *Medicinal Chemistry Research*. 2015.
- Namazi R, et al. "Inhibitory activity of *Avicennia marina*... against HIV and HSV", *Iranian Journal of Pharmaceutical Research*. 2013.
- Collaboration in publishing several other specialized articles in reputable international and domestic journals regarding viral (HIV) evaluations and novel pharmaceutical compounds.

Software & Language Skills

- **Software:** Mastery of SPSS, GraphPad Prism, EndNote, and Microsoft Office Suite.
- **Foreign Languages:** English.
